

"DELIVERING EXCELLENCE"

Rubber Injection Moulding Operations

We are also planning to install DESMA make Rubber Injection Moulding machine for the purpose of making high precision rubber and silicon-rubber products. Considering the requirement of rubber to metal bonded products for various applications in varied industries, we would also be able to make the same with our technical Expertise in this field. As our punch line says, we at Mudra Industries, are committed to deliver (all round) excellence to our valuable customers. We are looking forward to serve OEMs as well as after-market for high quality requirements.

CNC Wirecut Operations

We are pleased to inform you that we have installed a very high precision **FANUC**, Japan make brand new **ROBOCUT** (CNC EDM Wire Cut) Machine at Ahmedabad.

The machine is

1. Equipped with AI, AV, AWF and so many other special features.
2. It has the cutting capabilities with working area/table size 320 mm X 220 mm; job size of 650 mm X 450 mm X 170 mm.
3. Having 5 Programmable Axis, thus making it easy to handle 3D Shapes and Complex Contours.
4. Tapering and Die Relief cutting to cut angles up to 30 degrees.
5. Capable to provide an excellent surface roughness varying in the range of 0.4 μmRa to as low as 0.10 μmRa depending on the type of material.

The machine is capable of cutting various materials like

- Die Steel • Hardened Tool Steel
- Mild Steel • Stainless Steel
- Poly Crystalline Diamond • CBN
- Tungsten Carbide • Copper • Nickel

We under take JOB WORK of

- Bending Dies • Plastic Moulding Dies
- Progressive Dies • Stamping Components
- Extrusion Dies
- Any other wire cutting job as per customer drawings/requirements

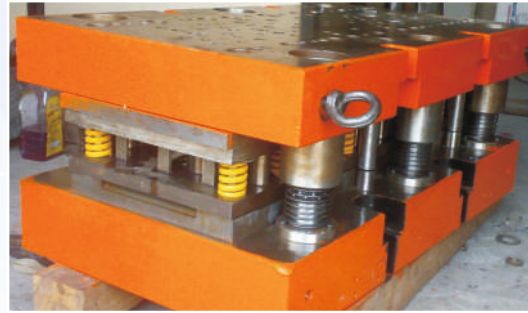

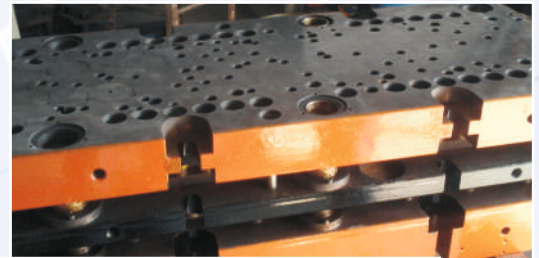

We also undertake manufacturing and development of complete Progressive Tools and Stamping Tools as per customer requirements.

Mudra Industries is backed by highly experienced, qualified, competent team of Engineers having enterprising abilities.
